

IN THE SPECIFICATION

Please replace the entire paragraph beginning on page 6, line 14 of the specification and ending on page 6, line 19 (beginning with the word "To" and ending with the word "minimized.") with the following:

A/

--To increase the overall strength of the anchors 30, the invention makes the lengths, l_B , of the anchor legs 32 along the direction of good side-wall step coverage (direction B) longer than the lengths, l_C , of the anchor legs 32 along the direction of poor side-wall step coverage (direction C). This way, the lengths of the anchor legs 32 along the direction of good side-wall step coverage are maximized while the lengths of the anchor legs 32 along the direction of poor side-wall coverage are minimized. Preferably, the lengths of the anchor legs 32 along the direction of good side-wall step coverage is at least twice the lengths of the anchor legs 32 along the direction of poor side-wall step coverage.--
